**About ADINUSA  
Pro Training**

**Akademi Digital Nusantara (ADINUSA)** is a platform for digital talents to improve the capabilities in IT field with the best training materials from various subject areas. It also connects digital talents and companies that require qualified talents.

It started to focus on development of digital talents since 2018 through Ops Bootcamp named NOLSATU. We provided online training and generated tech talents to industries. Then, we rebranded it become ADINUSA in 2020 that provides training in Cloud Computing & DevOps area. Our signature training product is Btech Academy (BTA).

In order to expand the reach of digital talents, we released ADINUSA 2.0 as an academy integrated platform in 2023 that offers Pro Training & Pro Talent for Enterprise, and Course & Bootcamp for Community in 8 subjects area of IT skills. And we will always commit to develop our product and services being the best one-stop academy platform.

# ADINUSA Pro Training

About

**ADINUSA Pro Training**, previously known as **Btech Professional Training**, is a training service aimed at professionals or company employees who want to improve their abilities. Our specialists in Cloud Computing and DevOps use open-source software. We provide a hands-on lab for authentic experience of best practices in the field. Have more than 30+ Client multi-company.

# ADINUSA Pro Training

## Benefit

Certified Instructor

International Curriculum and based on industry cases

Official Training Partner

Flexible Time and Place

Hands-on Lab for real-case experience

Materials that can be accessed for 1 year

Get regular material updates

Free consultation for 1 month about the training material

Receive training certificate and internal certification

# Our Trainer Certificate

Certified Openstack Administrator (COA)

Linux Foundation Certified System Administrator (LFCS)

Certified Kubernetes Administrator (CKA)

RedHat Certified System Administrator (RHCSA)

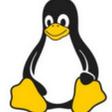

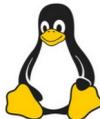

Certified Kubernetes Security (CKS)

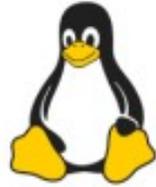

AWS Certified Solutions Architect

# Linux System Administration (LF-ADM)

**Duration: 32 Hours (4 Days)**

## Audience:

- System Administrators
- Cloud Administrators
- Developer Engineers
- Site Reliability Engineers

## Prerequisites

Linux IT Associate (LF-ASC)

## Outline

- Linux File System Tree Layout
- Signal & Processes
- Package Management Systems
- System Monitoring
- Process Monitoring
- I/O Tuning & Scheduling
- Advanced Storage
- Kernel Service & Configuration
- User & Group Management
- Networking
- Security (Firewall)
- Virtualization & Container Overview
- LFCS Internal Exam

[Click on Title to View Syllabus](#)

# OpenStack Administration (OS-ADM)

**Duration: 32 Hours (4 Days)**

## **Audience:**

- System Administrators
- Cloud Administrators
- Storage Administrators

## **Prerequisites**

- Linux System Administrator (LF-ADM)
- Docker Administration (DO-ADM)

## **Outline**

- Course Introduction
- Install an OpenStack
- Introduce Launching An Instance
- Organize People and Resources
- Describe Cloud Computing
- Manage Linux Networks
- Prepare to Deploy An Instance with Public Access
- Deploy An Instance
- Manage Policy
- Manage Block Storage
- Manage Object Storage
- Prepare to Deploy An External Instance
- Deploy An Instance with Public Access
- Customize Instances

# Kubernetes Administration (K9-ADM)

**Duration: 32 Hours (4 Days)**

## **Audience:**

- System Administrators
- Cloud Administrators
- Developer Engineers
- Site Reliability Engineers

## **Prerequisites**

Docker Administration (DO-ADM)

## **Outline**

- Course Introduction
- Basics of Kubernetes
- Kubernetes Architecture
- Installation and Configuration
- High Availability
- API & API Access
- API Objects
- Managing State with Deployments
- Services
- Volumes and Data
- Ingress
- Scheduling
- Logging and Troubleshooting
- Security
- Deployment based on the Helm Chart

[Click on Title to View Syllabus](#)

# Kubernetes Developer (K9-DEV)

**Duration: 32 Hours (4 Days)**

## **Audience:**

- System Administrators
- Cloud Administrators
- Developer Engineers
- Site Reliability Engineers

## **Prerequisites**

Docker Administration (DO-ADM)

## **Outline**

- Course Introduction
- Kubernetes Architecture
- Installation and Configuration
- Application Build and Design
- Deployment Configuration
- Understanding Security
- Exposing Applications
- Certified Kubernetes Application Developer Exam Preparation

# Models and Terms

# Models

---

- **Onsite Training**

Onsite Training is a training primarily hosted by Btech in Bogor, typically held at the *Reaksi.co* coworking space as the default location.

- **Inhouse Training**

In-house training is a training offered by Btech, and it takes place at the customer's own office location.

- **Fullboard Training**

Fullboard Training is a training arranged by Btech at various hotels, and it is not restricted solely to the Jabodetabek area.

- **Online Training**

Online Training is a virtual training conducted by Btech through the utilization of the Microsoft Teams platform.

# Terms

---

- **Number of Participants**

The minimum number of training participants is 4 (four) people, which applies to all training models. If the number of participants is less than 4 (four) people and the customer still wants to carry out the training, then the fixed rate is charged for 4 (four) people.

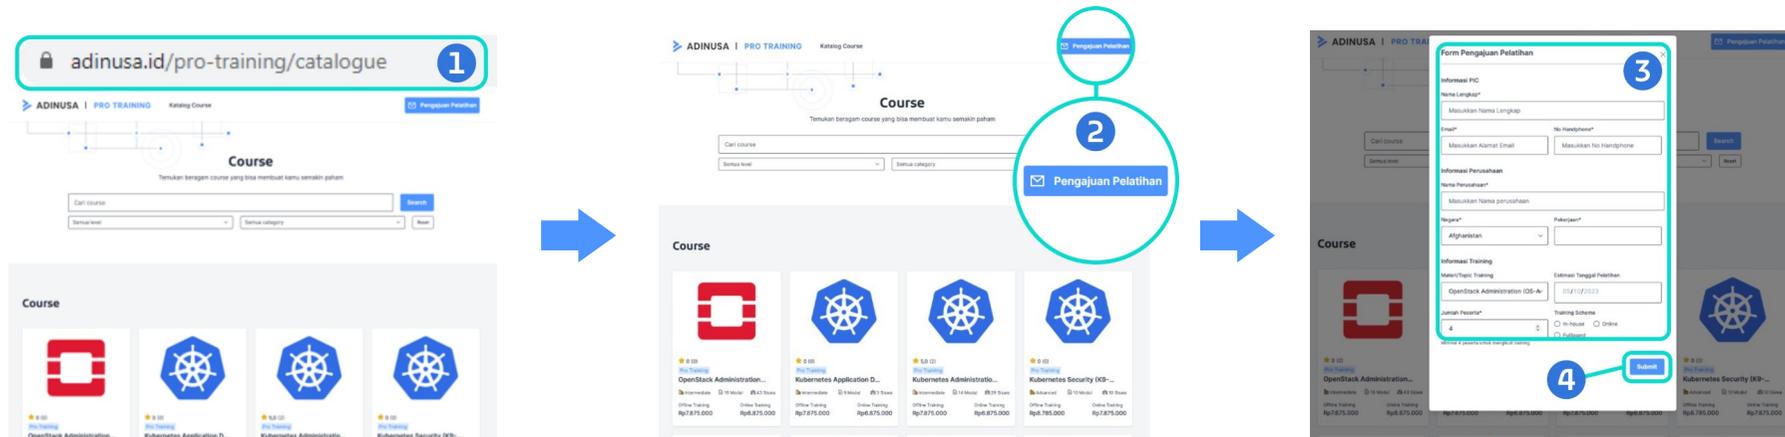

- **Training Date**

The training date is determined by agreement between Btech and the client, with the maximum time for confirmation of training implementation/payment being D-7 for in-house training and online training schemes. And then, for onsite and full-board training schemes, the maximum is D-14.

# Facilities

| Facilities  | Fullboard | Onsite   | Inhouse  | Online      |
|---|-----------|----------|----------|-------------|
| Meeting room  | ✓         | ✓        |          |             |
| Single / Twin bed room  | ✓         |          |          |             |
| Virtual Machine (Available until D+5 after training)              | ✓         | ✓        | ✓        | ✓           |
| Training materials (access up to 1 year from training start date) | ✓         | ✓        | ✓        | ✓           |
| Certificate of course completion                                  | ✓         | ✓        | ✓        | ✓ (Digital) |
| Stationery  | ✓         | ✓        | ✓        |             |
| Btech internal exam   | Optional  | Optional | Optional | Optional    |
| Lunch and Snacks  | ✓         | ✓        | Optional |             |
| Tote bag  | ✓         | ✓        | ✓        |             |
| T-shirt   | ✓         | ✓        | ✓        |             |
| Training record   |           |          |          | ✓           |

# Training Order Flow

1. Access the website <https://adinusa.id/pro-training/catalogue>.
2. Click Training Submission (Pengajuan Pelatihan) in the top right corner.
3. Fill in the form. Input the PIC, company, and training information.
4. Submit data.
5. The form will send an email notification to sales and sales will contact the PIC listed on the form.

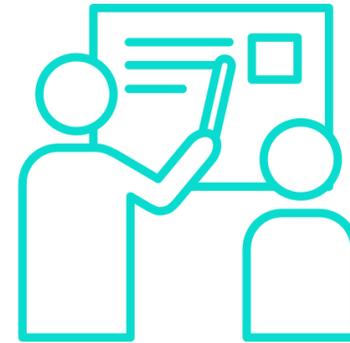

# Custom Training Order Flow

Contact us via  
*sales@btech.id* or  
+62 8111118187

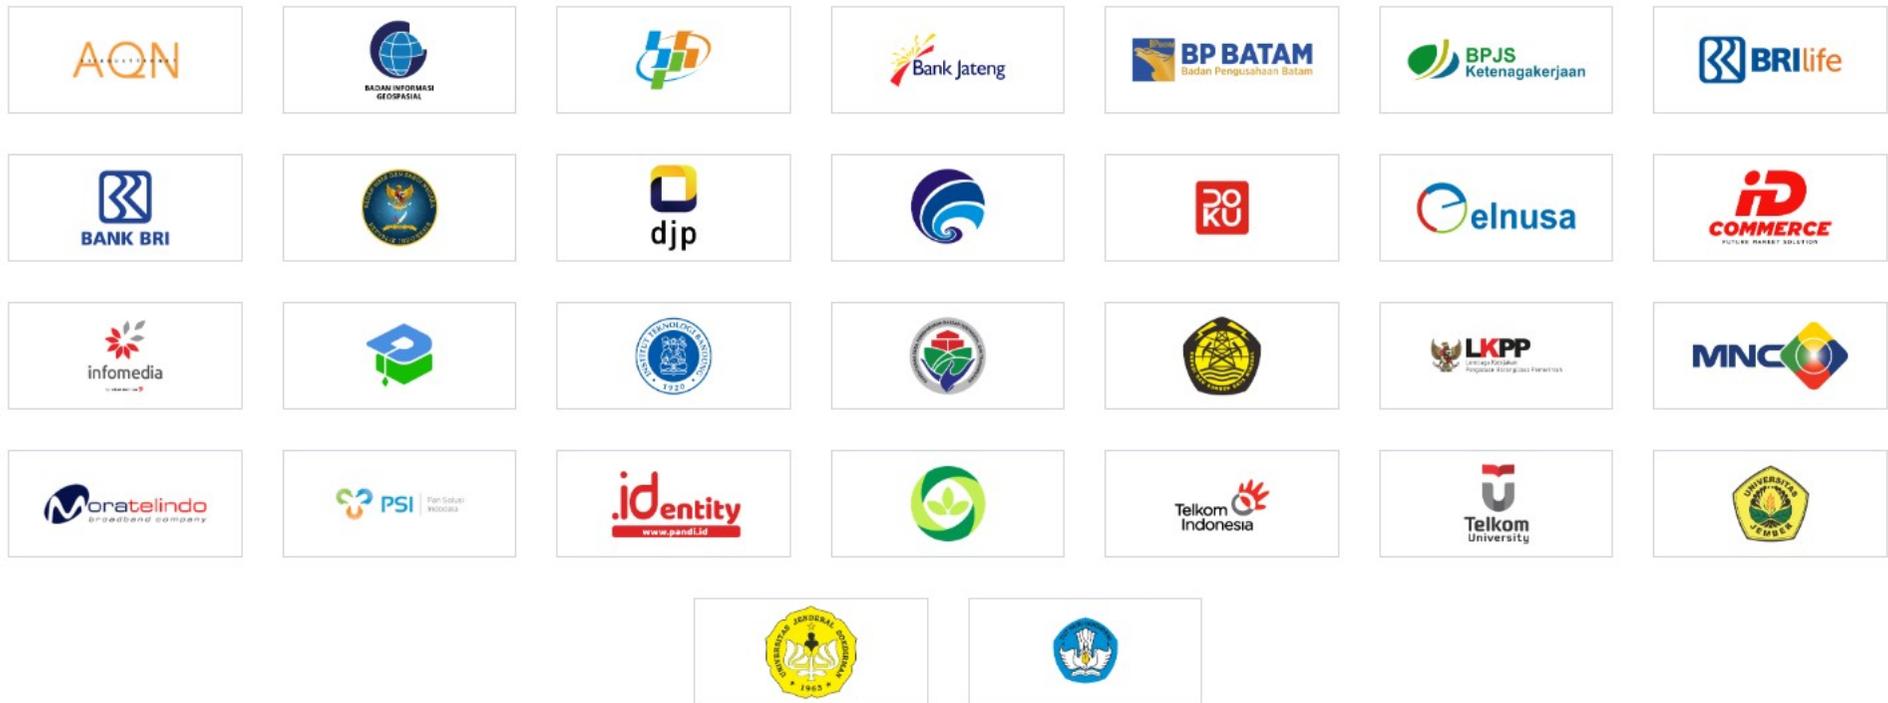

Inform the PIC, Company  
and Training needs

Fields custom training: Cloud,  
DevOps, DevSecOps, Cloud  
Security

# Our Clients

Over 30 various companies and agencies have placed their trust in us

# Testimonials

“Kelas yang nyaman, materi yang terstruktur, instruktur yang sabar dan berpengalaman. semoga ilmu yang didapat menjadi berkah. Bravo Btech.” —**Fajar Mochammad - IT Infrastructure BP Batam (training course: Kubernetes Administration)**

“Pelatihan professional dengan kurikulum yang berkualitas. Dilatih langsung oleh trainer tersertifikasi dengan materi yang memiliki kurikulum sama dengan LFCA bahkan di tambahkan materi lain sebagai penyempurna. Sangat rekomendasi untuk perusahaan / individu yang ingin mengembangkan skill / tenaga ahli dalam bidang IT.” —**Khaerul Anam - DevOps Engineer DDB BRI (training course: Linux IT Associate)**
